

Mosses with Hand-Lens and Microscope; A Non-Technical Hand-Book of the More Common Mosses of the Northeastern United States Volume 3

By Abel Joel Grout

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1903 edition. Excerpt: .in inner leaves. The inner perichaetial leaves are said to be shorter than the outer, and Sullivant says the leaves lack the plicae of P. fontana. BARTRAMIA Hedw. The Bartramias grow in moist niches in cliffs and on moist shady banks, looking much like tufts of green wool. Their capsules are globular and somewhat unsymmetric when moist, but dry with regular folds and alternate ridges. When very dry the body of the capsule becomes so shrunken as to be smaller than the mouth of the capsule itself. The leaves are long and slender and somewhat curled when dry, and strongly papillose. B. CEderi is somewhat of an exception as regards leaf characters, and by recent writers is put in the genus Plagiopus. Kcy 1. Leaves lanceolate, not papillose. CEderi. Leaves nearly linear, very long and narrow, papillose. 2. 2. Leaves from a sheathing scarious base....
