paperback. Book Condition: New. Ship out in 2 business day, And Fast shipping, Free Tracking number will be provided after the shipment. Pages Number: 263 Publisher: China Forestry Pub. Date :2010-9-1. Forest resources survey. a book used as a student of forest resources survey reference books. but also work as first-line manual for forestry workers. We tried to make the math book to keep the non-professional level. Therefore. although we covered many issues. including a very complicated way. we try first to clarify the inherent idea behind these issues. For those who need more information. forestry workers. we provide the relevant scientific papers and books. statistics and biostatistics bibliography. Most of the forest resources survey books related to the sampling and measurement issues. the first part of the book is also described in detail. However. since many countries covered by the survey of forest resources far more than the content. we also writes about the application of aspects of forestry. Today. most applications are related to some kind of remote sensing technology. so the second part of the book describes the use of remote sensing materials. The third section describes the natural resources around the world to start the investigation. The...
